## Needle Valves at a Glance

HOKE manufactures a complete line of precision needle valves. Before making your valve selection, be sure to consider the system pressure, operating temperature, required flow and materials of construction. If your application requires a valve not available in this catalog, please contact your HOKE stocking distributor or call HOKE at (864) 574-7966.

In addition to the needle valves in this catalog, HOKE manufactures other lines of specialty needle valves:

- Cylinder valves provide safe flow control for filling and draining cylinders. Valves are available with burst disks, spring relief devices, and metal or PCTFE stem tips. For more information, refer to HOKE's Sampling Cylinders and Accessories catalog (PN 79008).
- Gauge valves are typically used for calibration, isolation, and bleeding of gauges and other instruments. They allow for safe installation and removal of instruments and provide multiple mounting positions. For more information, refer to HOKE's Fluid Control Component catalog (PN 79020).
- Plug valves are used in applications where instant on/off service is necessary. HOKE plug valves are available in quarter-turn (7300 series) or rising stem (7400 series) models. Both designs include a straight through bore, which provides maximum flow and rodability. For more information, refer to the 7300 series catalog (PN 79039) and the 7400 series Catalog (PN 78165).

# Needle Valves at a Glance

## Dyna-Pak® Stem Packing System

Dyna-Pak® provides superior sealing performance while reducing maintenance costs. Consisting of alternate wafers of TFE and metal spacers, stem leakage is virtually eliminated while the problems associated with TFE cold flow are minimized.

As the packing nut is tightened, metal spacers squeeze the TFE wafers, driving the TFE against the stem. At the stem, forces are concentrated and the TFE wafers provide multiple line seals. In addition to squeezing the TFE wafers, the metal spacers help contain the TFE and drastically reduce its ability to creep.

Dyna-Pak® packing has the ability to:

- Utilize system pressure to increase effectiveness in eliminating leakage
- Provide reduced operating torque
- Help eliminate fugitive emissions
- Reduce the need for frequent packing adjustments
- Operate in temperatures from -65° to +450° F (-54° to +232° C)

## HOKE Needle Valves are Offered With a Choice of Stem Tip Options to Provide Greater Flexibility

**Blunt Vee-Point** The blunt vee-point stem tip provides full flow with only a few turns of the valve handle

**Regulating** The regulating stem tip has a gradually tapered tip which allows for greater control of flow.

### Non-rotating Metal Stem Tip

A non-rotating stem tip is typically used in high cycle applications to extend the service life of the valve. Its purpose is to prevent galling in the seat and on the stem tip. As the valve is closed, the stem tip contacts the valve seat, and is driven straight into it without rotating.

**Vee-Point** The vee-point stem tip is used to provide leak-tight shutoff in small orifice valves.

**PCTFE** A PCTFE stem tip requires a lower seating torque than a metal stem tip. It will provide full flow through the valve with only a few handle turns. The PCTFE tip is replaceable and has a maximum temperature of +250° F (+121° C)

### Non-rotating PCTFE Stem Tip

A non-rotating PCTFE stem tip operates in the same fashion as the non-rotating metal stem tip but requires less seating torque.

## Flow capacity of HOKE Needle Valves

The Cv factor is a flow coefficient expressing the rate of flow in gallons per minute of 60° F (16° C) water with a pressure drop of 1 psi across the valve. The flow is dependent on the inlet and outlet pressures, temperature, specific gravity and the Cv coefficient.

To determine the Cv or flow of a **liquid** @ 60° F (16° C):

$$Cv = \frac{GPM}{\sqrt{\frac{\Delta p}{S.G.}}} \quad \text{or} \quad GPM = Cv \sqrt{\frac{\Delta p}{S.G.}}$$

where:

$$\Delta p = p_1 - p_2$$

$p_1$  = inlet pressure in psia

$p_2$  = outlet pressure in psia

GPM = flow in gallons per minute

S.G. = specific gravity of liquid where water = 1 @ 60° F (16° C)

To determine the Cv or flow of a **gas** @ 70° F (21° C):

$$Cv = \frac{SCFH}{1360 \sqrt{\frac{(\Delta p)(p_1)}{(460 + T)(S.G.)}}} \quad \text{or} \quad SCFH = 1360 Cv \sqrt{\frac{(\Delta p)(p_1)}{(460 + T)(S.G.)}}$$

where:

$$\Delta p = p_1 - p_2$$

$p_1$  = inlet pressure in psia

$p_2$  = outlet pressure in psia

SCFH = flow in standard cubic feet per hour

S.G. = specific gravity of gas where air = 1 @ 70° F (21° C) and 14.7 psia

T = temperature in ° F

Note: Maximum effective  $\Delta p$  for compressible fluids is  $\frac{1}{2}p_1$ .

# 1700 Series

## Forged Body, Integral Bonnet Needle Valves

These affordable valves are suited for a wide variety of process control applications. Non-rotating stainless steel or replaceable PCTFE stem tips reduce galling. Dyna-Pak® packing below the stem threads prevents fugitive emissions.

### Typical Applications

- Cylinder valves
- Panel board instrumentation
- Pressure gauge valves
- Sampling systems
- Research laboratories
- Oxygen service
- Corrosive or high pressure service

### Technical Data

<b>BODY*</b>	316 stainless steel, Monel®
<b>MAXIMUM OPERATING PRESSURE</b>	6000 psig @ 70° F (414 Bar @ 21° C)
<b>OPERATING TEMPERATURE RANGE</b>	<i>Metal stem tip</i> -65° to +450° F (-54° to +232° C) <i>PCTFE stem tip</i> -20° to +250° F (-29° to +121° C)
<b>ORIFICE</b>	0.187" (4.8mm)
<b>Cv FACTOR</b>	0.31

\* Consult factory for other materials

### Features & Benefits

#### Safety

- Lock nut secures packing nut to prohibit accidental removal

#### Long cycle life

- Packing below stem threads prevents fluid from contacting the stem threads
- Non-rotating hardened 17-4PH stainless steel, Monel® or replaceable PCTFE stem tip is combined with a hardened 450 stainless steel - or Monel® thread gland to reduce galling

#### Helps eliminate fugitive emissions

- Dyna-Pak® packing provides a leak-tight seal with low operating torque

#### Reliability

- All valves are tested for bubble-tight leakage at both seat and packing

#### Installation variety

- Broad selection of male NPT, female NPT, and HOKE **GYROLOK**® fractional or metric tube fitting connections

#### Panel mounting

- Panel mounting is standard on all models
- Special High Tolerance NPT Thread

#### FOR YOUR SAFETY

IT IS SOLELY THE RESPONSIBILITY OF THE SYSTEM DESIGNER AND USER TO SELECT PRODUCTS SUITABLE FOR THEIR SPECIFIC APPLICATION REQUIREMENTS AND TO ENSURE PROPER INSTALLATION, OPERATION AND MAINTENANCE OF THESE PRODUCTS. MATERIAL COMPATIBILITY, PRODUCT RATINGS AND APPLICATION DETAILS SHOULD BE CONSIDERED IN THE SELECTION. IMPROPER SELECTION OR USE OF PRODUCTS DESCRIBED HEREIN CAN CAUSE PERSONAL INJURY OR PROPERTY DAMAGE.

## Ordering Options

### Spare Parts

Spare parts and repair kits are available for all needle valves. Please contact your distributor for specific information.

### Cleaning and Testing

When ordering, please specify if oxygen cleaning or helium leak testing is required.

### Additional Sizes

Additional sizes and options are available on special request. Please consult your local HOKE distributor.

# 2100 Series

## Bar Stock, Screwed Bonnet Needle Valves

This panel mountable, two-piece design is available in globe and angle patterns for flexibility of installation. Dyna-Pak® packing provides leak-tight sealing with low operating torque. Optional Graph-Lock® packing is available for high-temperature applications. The safety back-seating prevents accidental removal of the stem.

### Typical Applications

- Hydraulic systems
- High temperature service to +600° F (+316° C)
- Gas sampling
- Test stands

### Features & Benefits

- Safety**
  - Back seating provides added sealing protection
  - Lock pin prevents accidental bonnet disengagement
- High pressure capability**
  - 316 stainless steel valve maximum working pressure is 6000 psig (414 Bar)
- Extended temperature range**
  - Choice of Dyna-Pak® packing or high temperature Graph-Lock® packing
- Versatile**
  - Choice of regulating stem tip or metal stem with nonrotating replaceable PCTFE stem tip, with a variety of end connections
- Reliability**
  - All valves are tested for bubble-tight leakage at both seat and packing
- Panel mounting**
  - Panel mounting is standard on all models
  - Special High Tolerance NPT Thread

## Ordering Options

### Spare Parts

Spare parts and repair kits are available for all needle valves. Please contact your distributor for specific information.

### Cleaning and Testing

When ordering, please specify if oxygen cleaning or helium leak testing is required.

### Additional Sizes

Additional sizes and options are available upon special request. Please consult your local HOKE distributor.

## 2200 Series

### Bar Stock, Screwed Bonnet Needle Valves

Dyna-Pak® packing below the stem threads, a hardened thread gland and a Hastelloy® C-276 stem tip keep valves leak-tight while providing long cycle life. A choice of two flow capabilities enables use in a variety of severe service applications.

#### Typical Applications

- Corrosive handling
- Sampling systems
- Metering service

#### Technical Data

<b>BODY*</b>	316 stainless steel
<b>MAXIMUM OPERATING PRESSURE</b>	5000 psig @ 70° F (345 Bar @ 21° C)
<b>OPERATING TEMPERATURE RANGE</b>	-65° to +450° F (-54° to +232° C)
<b>ORIFICE SIZES</b>	0.086" to 0.313" (2.2 mm to 8.0 mm)
<b>Cv FACTORS</b>	0.12 to 1.40

\* Consult factory for other materials

#### Features & Benefits

##### Safety

- Lock pin prevents accidental bonnet disengagement

##### Durability

- Hastelloy® C-276 stem tip provides long service life

##### Extended temperature range

- Dyna-Pak® packing

##### Reliability

- All valves are tested for bubble-tight leakage at both seat and packing

##### Extended cycle life

- Dyna-Pak® packing below stem threads prevents washing away of thread lubricant and contamination of process fluid

##### Installation variety

- Choose from a broad selection of male NPT, female NPT and HOKE **GYROLOK**® tube fitting connections in globe or angle patterns

##### Panel mounting

- Panel mounting is standard on all models
- Special High Tolerance NPT Thread

## 2219 Series

### Severe Service Needle Valves

The new HOKE 2219 Needle Valve is an excellent choice for many steam- and severe service applications. Grafoil® packing below the stem threads provides exceptional service at temperatures up to +1000° F (+538° C). The non-rotating 316 stainless steel stem tip prevents galling.

### Typical Applications

- Steam service in power plants
- Hot condensates

### Technical Data

<b>BODY MATERIAL</b>	316 stainless steel, carbon steel, Hastelloy® C-276, and Monel®
<b>MAXIMUM OPERATING PRESSURE</b>	6000 psig @ 70° F (414 Bar @ 21° C)
<b>PROOF PRESSURE SAFETY FACTOR</b>	2:1
<b>BURST PRESSURE</b>	4:1
<b>TEMPERATURE RANGE</b>	-100° F to + 1000° F @ 1750 psig max. (-75° C to + 538° C @ 120 bar max.)
<b>ORIFICE SIZES</b>	0.170", 0.250", 0.312", and 0.437" (4.3 mm, 6.4 mm, 7.9 mm, and 11.1 mm)
<b>C<sub>v</sub> FACTORS*</b>	0.47, 1.09, and 1.20

\* C<sub>v</sub> factor for 0.437" orifice not available at time of publication

### Features & Benefits

- Meets ANSI 900# specifications
- Grafoil® packing below threads isolates threads from media.
- Non-rotating 316 stainless steel stem tip prevents galling
- High pressure / high temperature use
- All standard components are 316 stainless steel
- Standard 316 stainless steel cast handle
- Fractional end connections available up to 1"; metric end connections up to 25 mm
- **GYROLOK®**, female NPT, NPS-, or tube socket weld end connections
- Bubble-tight leak testing at both seat and packing
- Special High Tolerance NPT Thread

## 2700 Series

Bar Stock, Screwed Bonnet Needle Valves for Sour Gas Service

Featuring packing below the stem threads, nonrotating metal stem tip, hardened thread gland and a 316 stainless steel body, these valves are well suited for sour gas applications as well as other severe service applications.

### Typical Applications

- Refineries
- Chemical processing
- Oil and gas exploration

### Technical Data

<b>BODY</b>	316 stainless steel
<b>MAXIMUM OPERATING PRESSURE</b>	6000 psig @ 70° F (414 Bar @ 21° C)
<b>OPERATING TEMPERATURE RANGE</b>	-65° to +450° F (-54° to +232° C)
<b>ORIFICE</b>	0.187" (4.8 mm)
<b>Cv FACTOR</b>	0.60
<b>END CONNECTIONS</b>	½" female x ½" female NPT

### Features & Benefits

#### Safety

- Lock pin secures packing nut against accidental removal

#### Sour gas service

- Materials offer corrosion-resistant properties where hydrogen sulfide is present.

#### Corrosion resistance

- All wetted parts constructed of high chrome, high nickel austenitic stainless steel provide uniform chemical corrosion properties

#### Helps eliminate fugitive emissions

- Dyna-Pak® packing below the stem threads prevents fluid from contacting stem threads

#### Extended cycle life

- Nonrotating 17-4PH stainless steel stem tip and XM-19 stainless steel stem prevent galling

#### Reliability

- All valves are tested for bubble-tight leakage at both seat and packing
- Special High Tolerance NPT Thread

## 2800 Series

### Forged Body, Union Bonnet Needle Valves

For the most severe service applications, these valves feature a stem backseat for safety, a long cycle life with high temperature capability to 700° F (370° C), and a union bonnet for safe, convenient maintenance.

#### Typical Applications

- High temperature service to 700° F (370° C)
- Corrosive handling
- Reactive and hot condensates

#### Technical Data

<b>BODY</b>	316 stainless steel
<b>MAXIMUM OPERATING PRESSURE</b>	<i>Grafoil® packing:</i> <ul style="list-style-type: none"><li>• 4000 psig @ 70° F (276 Bar @ 21° C)</li><li>• 2500 psig @ 700° F (172 Bar @ 370° C)</li></ul> <i>Dyna-Pak® packing:</i> <ul style="list-style-type: none"><li>• 5000 psig @ 70° F (345 Bar @ 21° C)</li></ul>

## 3700, 3800, 3900 Series

### Forged Body, Integral Bonnet Needle Valves

Offered in four different body materials, this group of valves can handle a wide range of general purpose liquid and gas applications. Six types of stem tips are available, including two styles of vee-points.

#### Typical Applications

- Instrument air lines
- Sampling
- Gas chromatography
- Test stands
- Cylinder valves

#### Technical Data

<b>BODY*</b>	316 stainless steel, Monel®, carbon steel, brass
<b>MAXIMUM OPERATING PRESSURE</b>	316 stainless steel, Monel®, carbon steel 5000 psig @ 70° F (345 Bar @ 21° C) Brass 3000 psig @ 70° F (207 Bar @ 21° C)
<b>OPERATING TEMPERATURE RANGE</b>	Metal stem tip -65° to +450° F (-54° to +232° C) PCTFE stem tip -20° to +250° F (-29° to +121° C)
<b>ORIFICE SIZES</b>	0.060" to 0.312" (1.5 mm to 7.9 mm)
<b>Cv FACTORS</b>	0.07 to 1.10

\* Consult factory for other materials

#### Features & Benefits

##### Safety

- Integral bonnet provides differential thread pitch between stem threads and packing nut thread preventing accidental stem removal

##### Stem tip options

- A choice of PCTFE, metal, vee-point, blunt vee-point, or regulating stem tips

##### Helps eliminate fugitive emissions

- Dyna-Pak® packing provides a leak-tight seal with low operating torque in deep vacuum or high pressure applications

##### Dependability

- All valves are tested for bubble-tight leakage at both seat and packing

##### Installation variety

- Broad selection of male NPT, female NPT, and HOKE **GYROLOK**® fractional or metric tube fitting connections

##### Handle options

- Color-coded handles are available for identifying system fluids

##### Panel mounting available

- All models can be ordered for panel mounting

##### Easy maintenance

- All models can be panel mounted without packing disruption. Packing can be adjusted without removal from panel
- Special High Tolerance NPT Thread

\* 3912 series is not available with plug button

D-style panel mounting

### O-ring Packing

O-ring packing is available for all 3700 and 3800 Series valves. For Buna-N o-ring packing, specify kit number 3700K1. For Viton® o-ring packing, specify kit number 3700K2. For additional o-ring options, contact your local HOKE distributor.

### Panel Mounting

3700 & 3800 Series

**D-style:** HOKE's factory-installed panel mounting permits valve installation without disrupting the packing. In addition, future packing adjustments may be performed while the valve is mounted. Factory-installed panel mount D-style is available for all models except the 3732 Series (globe pattern, vee-point stem). To order, add a 'D' prefix to the model number (e.g., D3712G4Y)

**P-style:** Panel mounting kits may be field installed on all 3700 and 3800 Series valves (including the 3732 Series). Once the kit is in place, valves may be mounted without disrupting the packing. All future packing adjustments must be performed with the valve removed from the panel. To order, specify part number 306-86A, which contains one kit.

P-style panel mounting kits

### Panel mounting dimensions for 3700 & 3800 Series

Panel hole = ¼" (16.2 mm) diameter

Panel thickness =  $\frac{3}{16}$ " (4.7 mm) maximum

### 3900 Series

P-style panel mounting kits for field installation are available. To order, specify kit number 3900K1

#### Panel mounting dimensions for 3900 Series

Panel hole =  $\frac{4}{16}$ " (19.4 mm) diameter

Panel thickness =  $\frac{5}{16}$ " (7.9 mm) maximum

### Spare Parts

Spare parts and repair kits are available for all needle valves. Please contact your distributor for specific information.

### Cleaning and Testing

When ordering, please specify if oxygen cleaning or helium leak testing is required.

### Additional Sizes

Additional sizes and options are available on special request. Please consult your local HOKE distributor.
